

TRANSPORTABLE

SUPER SMALL BUILDINGS

SUPER SMALL BUILDINGS

SuperSmall is just as you'd think! So small that we've put them in a category of their own. These special small buildings could be a guard house, equipment shelter, communications hut or used for practically any purpose you can think of.

If you'd like us to create a super small building for your use, then talk to a member of our team today. As we design and manufacture all of our products this gives us the ability to build virtually any design with any level of finish required. We can easily accommodate your needs.

CUSTOMISATION

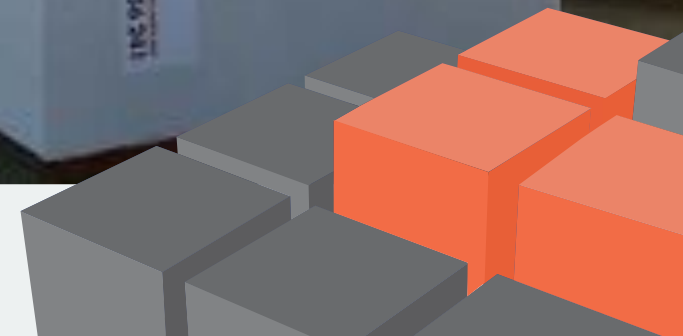

As we design and manufacture all of our products this gives us the ability to build virtually any design with any level of finish required for your project. With over 5000 projects in our reference library there may be something similar to your needs that we've already built. These designs are a guide only and certainly not the extent of our range. You should give us a call to discuss your needs so that we can help find the right design to start from to suit your needs.

EXTERIOR FINISHES

Does your project require a building that doesn't look like a transportable? We specialise in building transportable buildings that look amazing and don't look like a temporary building. For some inspiration on the options available visit the Exterior Finishes page.

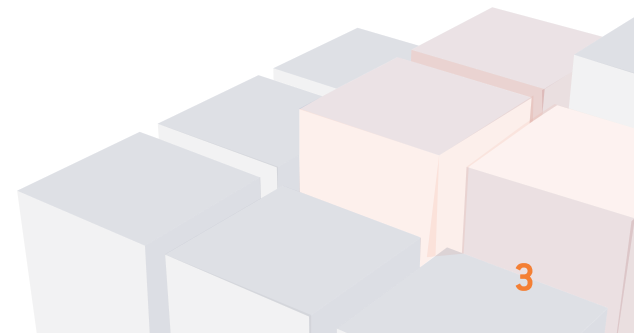

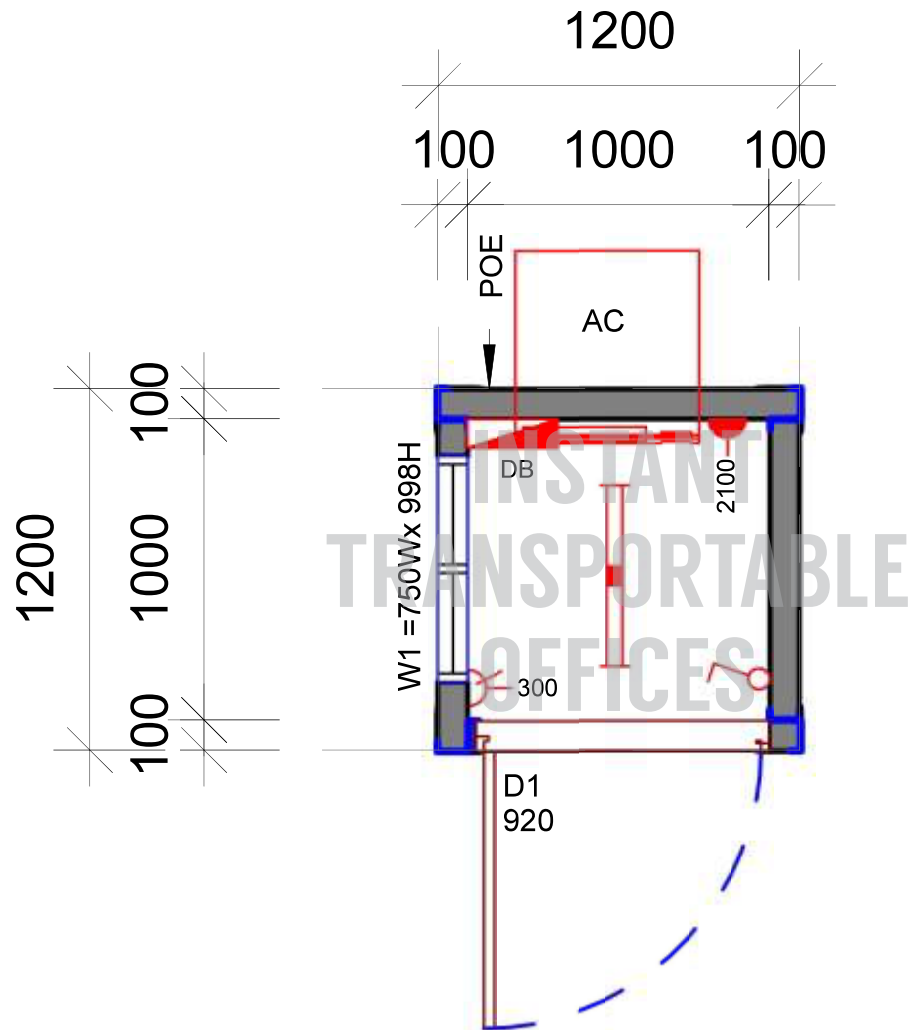

CYCLONIC

Any of our designs can be manufactured to suit the highest cyclonic rated areas in Australia and off-shore within the Asia Pacific region. Specification changes apply to suit cyclonic areas. Ask a member of our team to assist you with your design to suit your cyclonic region.

MODEL: 7126

1.2m x 1.2m Super Small Building

MODEL: 7128
